Extension election period in Istanbul makes timing of recovery Turkish market less predictable

Hooglede-Gits, Belgium, 9 May 2019 – Ege Profil Ticaret ve Sanayi AS, the 95.88% owned Turkish subsidiary of Deceuninck NV which is listed on the Istanbul Stock Exchange (ticker: EGPRO.IS) today reported its Q1 2019 financial results.

In line with our expectations, Q1 sales decreased to € 35.2m (TRY 215.2m) representing a 30% decline against an exceptionally strong Q1 2018 following the general slowdown of this economy. Despite the lower volumes, unaudited EBITDA remained resilient at 11.8% on sales, thanks to the flexible cost structure of the Turkish plants and the various countermeasures taken by management.

We remain convinced about the long term potential of the Turkish market, however the extension of the election period in Istanbul makes the timing of the recovery less predictable. The Board and Management are convinced that these challenges can be turned into opportunities. On the domestic market we are growing market share thanks to our strong brands. In parallel, the weaker Lira is making Turkey more competitive for export and we are therefore accelerating the use of the efficient and state-of-the-art Turkish manufacturing facilities as export hub for the Group.

Business development in the other regions (Europe, North America and Emerging Markets) evolves in line with expectations.
